INTRODUCTION:

MUTASIM ARCHITECTS was established in 2010 with a commitment to provide high quality services to clients. Since its establishment the firm has been providing complete architectural services to variety of private, corporate and institutional clients and it's our goal to establish and build long term, mutually beneficial relationships with our clients.

Since its founding in 2010, "MUTASIM ARCHITECTS" has become the leading company for the architectural matters especially in "EVACUATION PLANS" in Pakistan. We are very conscious about Health & Safety issues. As we all know that; at every site, health & safety is a big element of compliance especially of social compliance. Evacuation Plan / Emergency Plans are the prominent element of health & safety and "MUTASIM ARCHITECTS" have been involved in this topic keeping in view the local & international standards of health & safety.

By choice we are small firm but are capable to handle a project of any scale.

WHY EVACUATION PLANS:

1. Emergency Evacuation Plans are developed to ensure the safest and most efficient evacuation time of all expected residents of a structure. A benchmark "**evacuation time**" for different hazards and conditions is established. These benchmarks can be established through using best practices, regulations, or using simulations, such as modeling the flow of people in a building, to determine the benchmark. In the proper evacuation plan shows multiple exits, contra-flow lanes, and special technologies to ensure full, fast and complete evacuation.

2. Evacuation Plan is necessary not only to comply international, national and provincial law but also very helpful in guiding effectively and easily to trained persons, untrained persons, new fellows or guests about the steps to be followed at time of emergency for safe evacuation from the building where there is any element present in the area which may impede safe evacuation at the time of need.

MISSION STAMENT:

Our Mission is to increase the education, the professionalism and spirit of service of our team, in order to give the best quality service and the best delivery time to our respective clients.

VISION STAMENT:

"We believe that we are on the face of the earth to make Good Evacuation / Emergency & Building Plans and that's according to the situation. We are constantly focusing on innovating. We believe in the simple not the complex. We believe in saying no to thousands of projects, so that we can really focus on the few that are truly important

and meaningful to us. We believe in deep collaboration and cross-pollination of our groups, which allow us to innovate in a way that others cannot. And frankly, we don't settle for anything less than excellence in every group in the company, and we have the self-honesty to admit when we're wrong and the courage to change. And I think regardless of who is in what job those values are so embedded in this company that Mutasim Architects will do extremely well."
